

Rejuvenate Soils with Marl & Natural Gypsum !

Our high performance soil conditioner is a unique blend of Marl & Natural gypsum that is rich in Calcium and Sulphur

Marl is a natural neutralising agent that can be used to cure acidic soils, encourage better root systems, and enhance microbial activity as it is mainly composed of dolomitic mudstone.

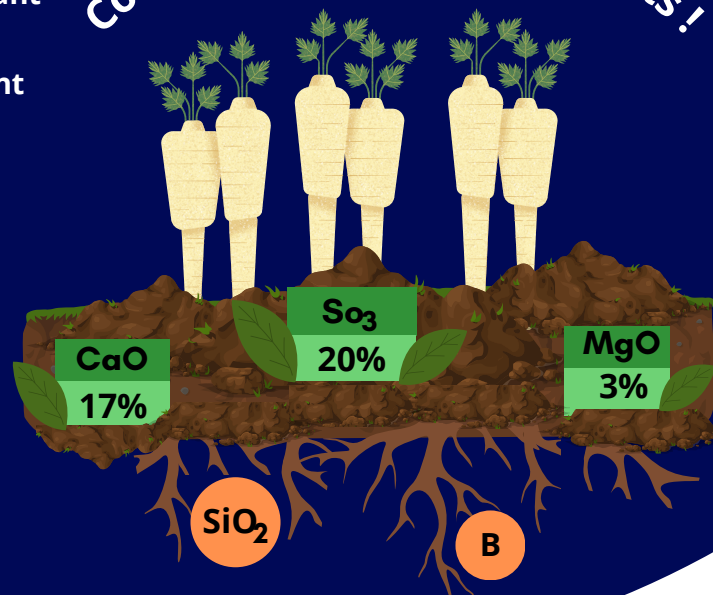

The combined effects of marl and natural gypsum boosts nutrients in the soil which recharges and revives dormant and depleted soils into nutrient abundant and productive soils

 Natural Product Quarried & Mined in Nottingham and Staffordshire

- ✓ Improves texture & structure of soil making them workable
- ✓ Suitable for clay abundant soils as it can break down compact clay particles to release locked nutrients
- ✓ Improves Soil Porosity allowing efficient water infiltrations
- ✓ Improves calcium levels, aeration and drainage allowing efficient water and nutrient uptake
- ✓ Enhances Root Growth
- ✓ Chemical-free way to boost soil fertility
- ✓ Contains 20% Silica which can increase resistance to fungal and pest attack
- ✓ Balances pH in acidic soils (NV value = 7)
- ✓ Restores and maintains soil vitality enabling robust plant growth
- ✓ Contains 1.2% Boron which is essential for optimal plant metabolism and other physiological functions
- ✓ Versatile product that is suitable for all soil types
- ✓ Low Carbon Footprint
- ✓ Contributes to long-term, soil enrichment, productivity and overall agricultural sustainability

With 5% K to activate and support vital plant enzymes !

Contains Vital Trace Nutrients !
